MICHELLE ENVIRO

Wet Scrubber System

Product Overview:

The *Michelle Enviro Wet Scrubber* effectively removes particulate matter, acid gases, and toxic fumes from process exhaust streams. It uses a water or alkali-based scrubbing solution to neutralize pollutants, making it ideal for industries generating gaseous or dust-laden emissions.

Parameter	Specification
Model Name	ME-WS
Type	Venturi Type Wet Scrubber
Air Handling Capacity	20,000 m^3/hr
Pollutants Controlled	PM, SOx, NOx, Acidic Vapors
Scrubbing Medium	Water / Caustic / Chemical Solution (as per gas composition)
Material of Construction	SS 304/316
Collection Efficiency	≥ 98% for Dust and Gaseous Pollutants
Pressure Drop	150–200 mm WC
Water Recirculation	Centrifugal Pump (5 HP / 3-phase)
Drain and Overflow System	Provided
Maintenance Interval	6 Months (based on operating conditions)
Warranty	12 Months from Date of Installation
Applications	Textile plants, Chemical Plants, Foundries, Galvanizing, Pickling Units, Furnaces, Dyeing Units
